ABOUT

A professional and upbeat sound recordist that would be an asset to any crew.

Many years of experience in the field working a wide variety of productions from corporate and live events to narrative and tutorials. Drawing from a knowledge base and skill set to get the job done, all with a positive attitude and open approach.

A certified Pro Tools Operator with experience in post production means that decisions on set are more focused and geared towards delivering the perfect audio solutions for the next stage of production. Very much a team player while trusting my intuition. A full UK driving licence holder, trained in Emergency First Aid Level 3 and DBS checked.
